WORK EXPERIENCE

Tiger IT Bangladesh Ltd - Front-End Engineer

May 2019 - current

Dhaka, Bangladesh

- Worked with design, product, and back-end teams to create web products.
- Created 3 efficient and reusable front-end systems to drive web applications to the marketplace.
- Participated in product releases and code reviews with 5 senior developers and team leads.
- Consuming and integrating restful API in a JS application and optimized application for maximum speed.
- Built from visual design and wireframe to be responsive, accessible, and performance across all types of devices.

SlassTec – UI Developer

December 2018 - May 2019

Dhaka, Bangladesh

- Collaborated with other team members and stakeholders to develop new user-facing features.
- Assisted in building 100% reusable code and libraries for future use.
- Evaluated end-to-end designs for performance complexity, scalability, quality, and accessibility.
- Optimized 15+ applications for maximum speed and scalability.
- Validated 100% of user input before submitting to the back-end.
